PROFILE

Junior penetration tester & SOC analyst with authorized web/API/network assessment, SIEM detection engineering (ELK home lab, 50k+ events, 5 Sigma rules MITRE-mapped), incident response triage (isolated Windows 10 VM forensics, Sysmon/KAPE) and cloud IAM hardening (AWS lab, ScoutSuite/Prowler), backed by Linux, Windows, Active Directory and software-engineering foundations. Recognized via 20+ Hall of Fame acknowledgments and Top 5/100 Bastion CTF — I deliver reproducible evidence and clear remediation reports.

EXPERIENCE

Security Engineering Intern (Authorized Scope: Web/API & Network Assessment)

May–Sep 2024

Bastion Security — Security Engineering Internship (Moscow)

- Assessed 8 web apps & 2 network ranges in authorized scope — 11 validated findings (auth bypass/injection/privesc), 6 Linux + 4 Windows root validations.
- Validated every finding to root where applicable; documented 8 reports with 0 rework, including exploitation paths and remediation notes.
- Presented results for internal review; validated via manual testing plus ScoutSuite/Prowler-style cloud checks in lab.
- Ranked **Top 5 of 100** in internal penetration-testing and privilege-escalation challenges.

Software Engineer Intern

Feb 2025

National Research Tomsk State University

- Designed and developed 2 prototypes within university research projects.
- Created 12 diagrams (UML, component and activity) and academic-standard technical documentation across the software lifecycle.

SECURITY EVIDENCE

Bug-bounty Hall of Fame: DigitalOcean, Pinterest, Verisign, and Dell through responsible disclosure.

Competitive testing: Top 5 of 100 at Bastion's internal CTF.

Security writing: API security, Active Directory attack paths, Linux hardening, malware analysis, and AppArmor defense validation.

CORE SKILLS

Offensive security

Web/API security, vulnerability assessment, OWASP, privilege escalation, red team, exploit development, Burp Suite, Metasploit, Nmap, SQLMap, Nuclei, ffuf, SIEM (ELK lab), Incident Response (lab), Cloud Security (AWS IAM lab)

Systems & defense

Linux, Windows, Active Directory, TCP/IP, network security, Kerberos, firewall, Wireshark, BloodHound, Impacket, AppArmor, MITRE ATT&CK, ELK/SIEM, Splunk (exposure), Sigma, YARA, Suricata (lab), malware analysis, threat intelligence, Incident Response, Cloud Security (AWS IAM)

Engineering & tooling

Python, Bash, JavaScript, C/C++, Assembly, SQL, Docker, Git, Ghidra, Cobalt Strike, Sliver

EDUCATION

B.Sc. Software Engineering — Conferred Jul 2026

Tomsk State University
Sep 2022 – Jul 2026

CREDENTIALS & TRAINING

Junior Penetration Tester

TryHackMe · 2024

Blue Team Junior Analyst

SecurityBlue · 2023

Cyber Threat Intelligence

IBM · 2023

CompTIA Linux+ · CCNA

OSCP (In Progress)

OffSec · 2025

PNPT (In Progress)

TCM Security · 2025

PRACTICAL SECURITY LABS & PLATFORMS

Hack The Box — Verified Badges

TryHackMe — @iamkernel

SELECTED WRITING

API Security Testing

Active Directory Attack Paths

AppArmor RCE Mitigation
